Contribution	Characteristic	Suggestion for Improvement	Leadership	Course Name & Instructor Summary	Final Date
evaluated and interpreted data	coordinator	be more involved/active in the work	good listener – listened to input from other team members	ELT106 - AC Circuits You need to expand your contributions to the team to include more hands on and troubleshooting of the physical circuit being constructed. Strong preparation and calculation skills will help you in your labs and will help the team, so try to keep that up as well! Your good organizational skills and good preparation for the activities are a great start to developing leadership skills.	May-06
